Welcome to Fabrimex Systems

Fabrimex Systems, your worldwide partner for industrial monitors, panel PCs, customized PC systems and comprehensive industrial image processing solutions, headquartered in Switzerland with a branch and production facility in Taiwan. We specialize in custom systems tailored to our customers wishes. Our commitment lies in delivering high-quality and reliable products that meet the ever-evolving needs of the industry.

With a focus on innovation, we leverage cutting-edge technologies to ensure our products and services adhere to the highest standards. Our diverse product portfolio includes the distribution, design and assembly of industrial computers, fanless PCs, and COM modules, offering a wide range of solutions tailored to our customers' specific requirements. Our expertise in consulting enables us to assist clients in selecting the right technologies and components, ensuring optimal fulfillment of their individual needs.

Our clientele spans various industries, including automotive, electronics, food and beverage, pharmaceuticals and many others. We understand the specific needs of each industry and work closely with our customers to develop tailored solutions that surpass their expectations. Leveraging our years of experience and comprehensive expertise, we offer innovative products and services that cater to the high demands of our clients.

Contact us today to learn more about our products, first class services and our dedicated and highly qualified team. We look forward to assisting you in realizing your projects and offering top-notch solutions that exceed your expectations.

Industrial Computing

Welcome to our industrial computing department, where we specialize in providing cutting-edge solutions tailored to meet the unique requirements of our clients. With a comprehensive range of industrial motherboards and custom systems, we are equipped to deliver exceptional computing solutions that drive efficiency and reliability in the most demanding environments.

One of our outstanding offerings is our fanless box PCs, designed specifically for the machine industry, manufactured by the leading industrial PC suppliers in the world which are our long term partners since decades. These innovative systems operate silently and mostly without the need for fans, ensuring optimal performance even in harsh industrial conditions. Our commitment to delivering top-notch quality is unwavering, and our fanless box PCs exemplify our dedication to providing robust and durable computing solutions.

At the heart of our department lies a team of skilled engineers who possess the expertise and knowledge to support our clients throughout their computing journey. We work closely with our clients to understand their specific requirements and our engineers design and build custom systems that align perfectly with their needs. This personalized approach sets us apart, allowing us to deliver solutions that exceed expectations.

Display Solutions

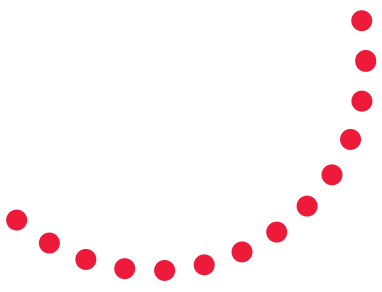

Our Display Solutions comprise of stainless steel, aluminium and metal touch monitors, as well as panel PCs tailored for the industrial sector. Our commitment to delivering top-notch quality is unwavering, making our products the ideal choice for businesses seeking superior display solutions.

Whether you prefer to choose from our extensive range of standard options or require customized products, even in small quantities, we have got you covered. Our team collaborates closely with clients, meticulously planning their requirements and offering expert guidance on the most suitable products. We pride ourselves on delivering high-end panel PCs and industrial monitors that surpass expectations.

Our aluminium, stainless steel and sheet metal industrial monitors and panel PC series

At the core of our department lies a dedication to providing exceptional customer experiences. We prioritize understanding our clients' unique needs and work hand-in-hand to identify the perfect solutions. With our deep industry knowledge and expertise, we offer unparalleled consultation services, ensuring that our clients receive the most appropriate display solutions for their specific applications.

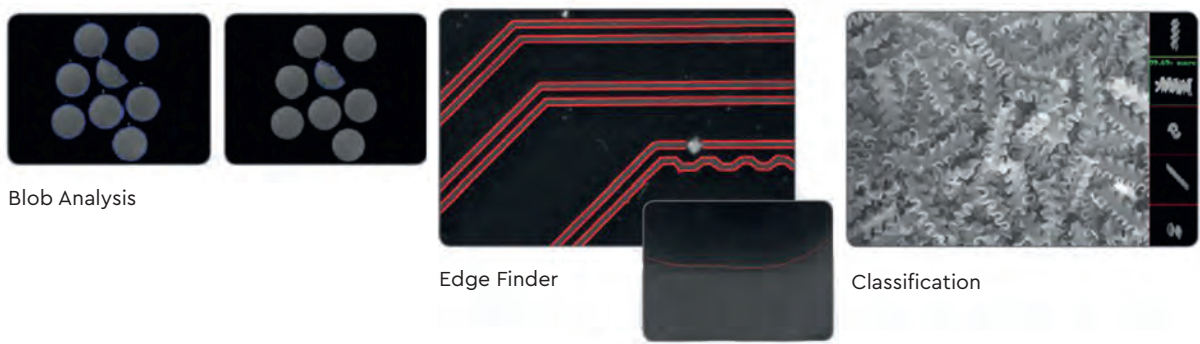

Machine Vision

Presenting our esteemed machine vision department, a key pillar of our highly accomplished enterprise. Within our ranks, we harbor a team of exceptionally trained and skilled professionals who possess a wealth of experience in the realm of image processing. Our department prides itself on executing numerous collaborative projects with clients, providing tailored and intricate image processing solutions to augment their automation systems.

What sets us apart is our strong network of suppliers, enabling us to source and provide the finest products for a diverse range of applications, including optical lenses, industrial cameras and lightings. By leveraging our robust partnerships, we ensure that our clients receive top-of-the-line components that perfectly align with their specific needs and requirements.

Our team's extensive expertise, coupled with our strategic supplier relationships, allows us to deliver comprehensive consultation services and resolve complex challenges with utmost efficiency. From initial ideation to seamless integration, we work hand-in-hand with our clients to devise and implement cutting-edge machine vision solutions that surpass industry standards.

Example of our possibilities in machine vision applications

At the core of our department lies a deep commitment to collaboration and effective communication. We foster strong relationships with our clients, ensuring a thorough understanding of their unique objectives. This allows us to deliver bespoke machine vision solutions that empower businesses, streamline processes and drive tangible results.

By choosing our machine vision department, you gain access to a passionate team of professionals who are dedicated to delivering unparalleled value. With a proven track record of successfully completed projects and a continuous focus on innovation, we are the trusted partner for transforming automation systems with advanced vision capabilities.

Contact us today to explore how our machine vision department can revolutionize your operations. Together, we will harness the power of cutting-edge technology, premium components and unrivaled expertise to propel your business to new heights.

We equip you with the perfect tools and hardware to solve your machine vision challenge

Engineering

Introducing our engineering department, the backbone of our interdisciplinary team. Comprised of a group of exceptionally skilled and knowledgeable professionals, our Engineering Department boasts extensive experience in a multitude of fields. Specializing in custom board designs, project-based developments and tailored solutions for our esteemed clientele, we have successfully established ourselves as a reliable partner.

Our engineers possess a deep understanding of industry best practices and employ cutting-edge technologies to deliver superior results. With a wealth of expertise gained through years of dedicated service, our team consistently tackles complex challenges with precision and ingenuity. We pride ourselves on our ability to translate ideas into tangible realities, pushing the boundaries of innovation.

At our core, we prioritize collaboration and effective communication, ensuring seamless interactions between our engineering team and clients. We believe in fostering strong partnerships to truly comprehend and fulfill our clients' requirements, no matter how intricate they may be. By diligently engaging in comprehensive research, rigorous testing and meticulous quality control, we guarantee the highest standards of performance, reliability and safety in our solutions.

HDBaseT Technology

As a contributing member of the HDBaseT Alliance, we feature HDBaseT technology in our products. Whether you prefer the embedded version or would like to upgrade an existing installation, our true one-wire solution makes full use of the HDBaseT capabilities.

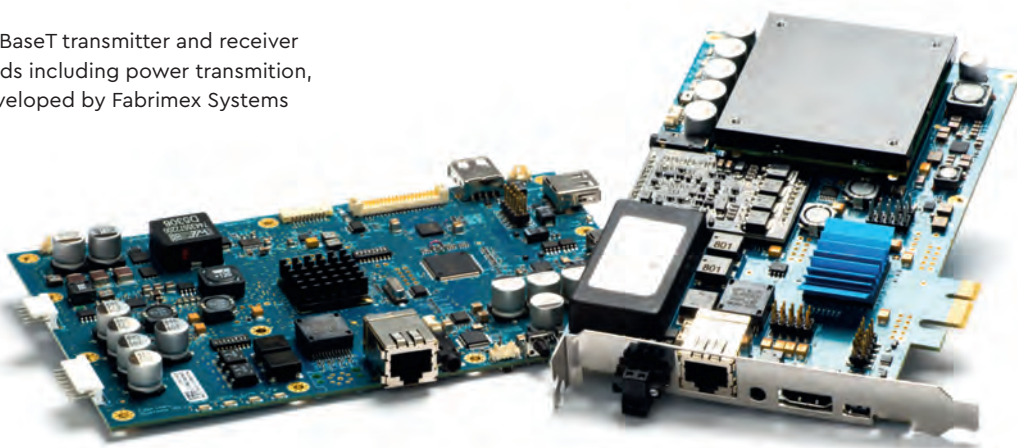

The HDBaseT standard revolutionizes the way audio, video, power, and control signals are transmitted over a single Cat 6 cable. Our products leverage this game-changing technology to deliver unmatched performance and convenience in industrial environments.

Reliable signal transmission: With HDBaseT, you can trust in the seamless transmission of high-definition audio and video signals, along with USB for data and devices. To round up, our engineering team made the full 100W transmission capability of Power over HDBaseT available to the receiving end. With this, no external power supply is needed to run your touch monitor, over only one single Ethernet cable.

Extended reach: One of the main advantages beneath the combination of all the different signals onto one cable is the possibility to transmit all the signals over a distance of 100 meters, overcoming the limitations of HDMI and USB cables.

So whether you want to reduce cable clutter and maintenance costs or have to overcome big distances, HDBaseT is your first choice.

HDBaseT transmitter and receiver cards including power transmission, developed by Fabrimex Systems

Meet the People

«I particularly value the multifaceted teamwork and the opportunity to creatively shape and continuously improve products from mechanics to the finest details in electronics, solving problems along the way.»

Remo Heimgartner
Senior Systems Engineer

«Whether it's production, CAD, or customer projects, technology never ceases to fascinate me, and I am thrilled to be able to apply my expertise for our customers!»

Patric Mooser
Field Application Specialist

«Digital technologies are my passion. I firmly believe that sustainable solutions can only be developed through close collaboration with the customer.»

Vincenzo Petrillo
Senior Systems Engineer

«My enthusiasm lies in competently assisting customers with their concerns and ensuring quick and effective support!»

Patrik Bieg
RMA & Field Support Specialist

«I find great joy and energy in the exceptional collaboration with customers and suppliers, while striving to provide the best possible service.»

Rodrigo Arias
Customer Support

«I love working with our customers to develop a tailor-made solution that meets the latest technology standards and provides sustainable added value.»

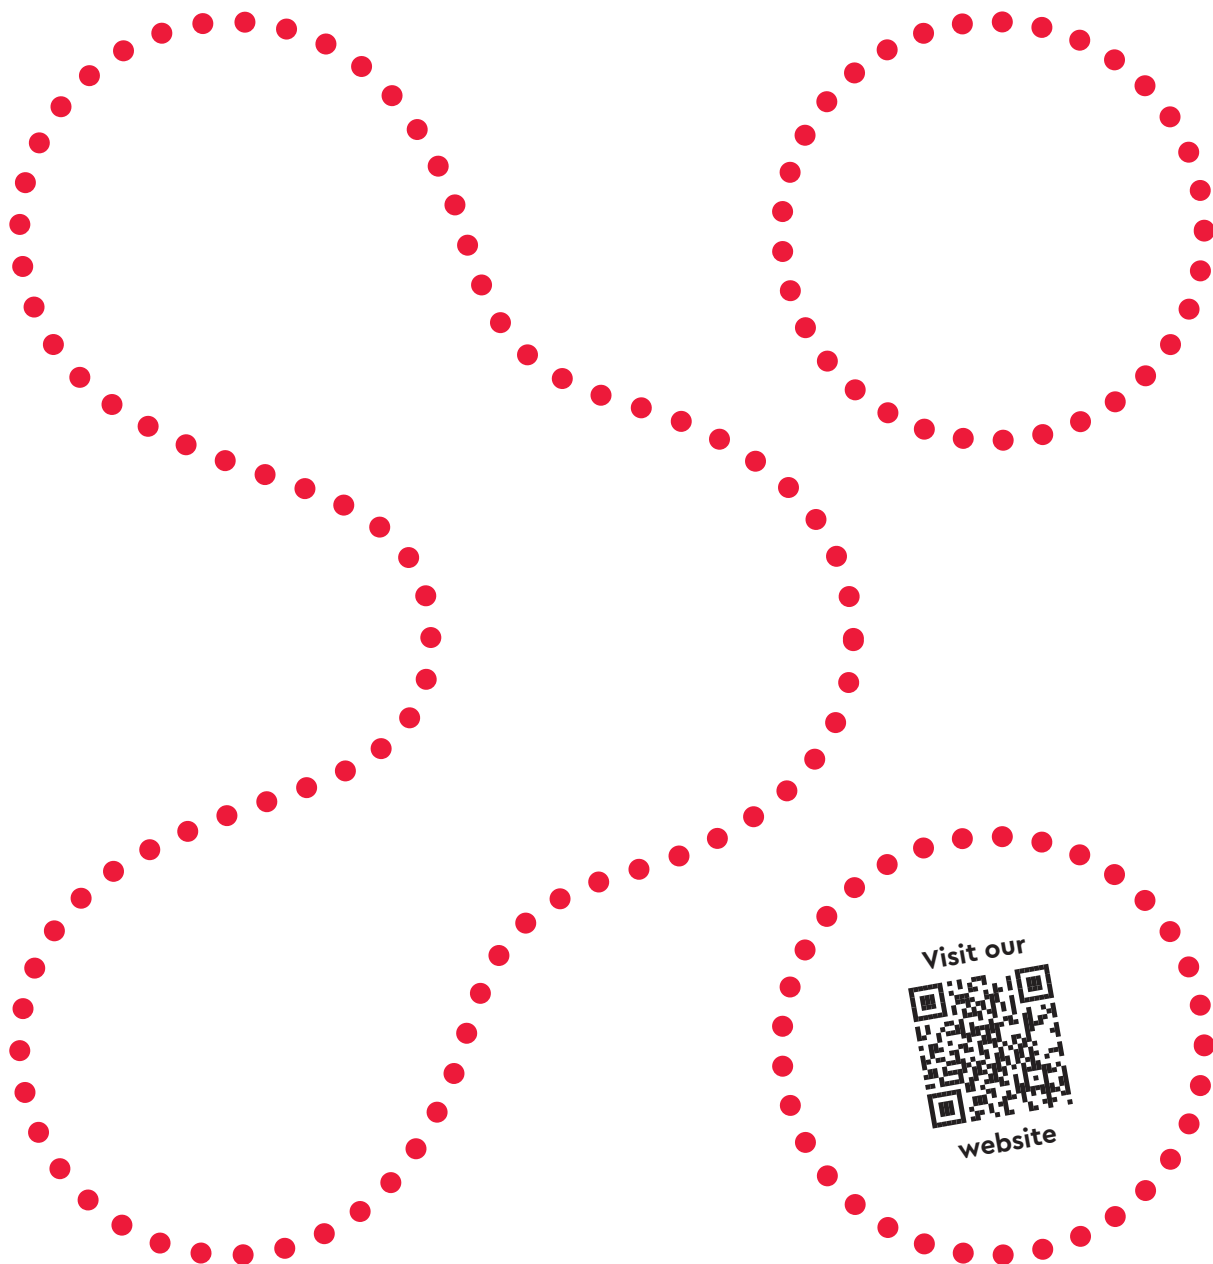

Mike Spizzi
Key Account Manager

Customer Service & Support

At Fabrimex Systems, we take pride in our customer support services, which are designed to assist our clients throughout their entire journey with us. From expert needs assessment and order administration to timely delivery, we are committed to ensuring customer satisfaction both nationally and internationally.

One of our key strengths is our expertise in demand planning and order administration. Through meticulous analysis and planning, we ensure that all framework orders are executed with precision, guaranteeing on-time deliveries. Whether it's through push-pull contracts, safety stocks, or precise deliveries, we never let our customers down.
